

ELECTRICAL

ALL WIRING MUST BE PERFORMED BY A LICENSED ELECTRICIAN IN ACCORDANCE WITH THE NATIONAL ELECTRICAL CODE AND ALL OTHER LOCAL CODES.

Pig tails are supplied on pumps and heaters for convenience.

GROUND: The green lead at the motor is intended for grounding and should be firmly attached to a suitable earth ground. A grounding lug is also provided on the motor.

ELECTRICAL WIRING:

CIRCUIT BREAKER	COPPER WIRE SIZE	
	50' RUN	100' RUN
20 AMP.	12 AWG	10 AWG
15 AMP.	14 AWG	12 AWG

All pumps and heaters are 110 volts.

All Tiffany Whirlpool tubs are supplied with an on/off air switch which is located on the deck of the tub. Timers are only supplied in lieu on request.

OPTIONAL:

We recommend the installation of a separate concealed on/off switch to prevent children and visitors from running the whirlpool without water in the system.

Tubs equipped with heaters may also have an on/off switch located away from the tub.
